**Virkon® tablets**

**Safety data sheet**

Prepared in accordance with Regulation (EC) No. 1907/2006 (REACH)

**Version 1.1 | Created: 20 May 2014 | Revised: 1 June 2015**

---

### SECTION 1. Identification of the substance/mixture and of the company/undertaking

**Product identifier**  
Virkon® tablets

**Trade name/Brand**  
Rely+On™ Virkon® tablets

**Synonym(s)**  
None

**REACH number**  
Mixture, not applicable

**CAS number**  
Mixture, not applicable

**EC number**  
Mixture, not applicable

**Relevant identified uses**  
Virkon® is a wide-spectrum disinfectant and cleaning agent, suitable for sterilising work surfaces.

A 1% w/v solution of Virkon® should be prepared from the tablets in accordance with the instructions in the NCBE Cauliflower cloning kit.

**Uses advised against**  
This disinfectant is NOT suitable for surface-sterilising plant tissue.

**Supplier of the product and of this safety data sheet**  
National Centre for Biotechnology Education (NCBE)  
University of Reading  
2 Earley Gate  
Whiteknights  
READING

W: www.relyon.dupont.com

**Emergency telephone number**  
0845 6006 640 (UK/Eire only)
SECTION 2. Hazards identification

Classification according to Regulation (EC) No. 1272/2008 [CLP]

Eye damage (Cat. 1), H318.
Eye irritation (Cat. 2), H319
Acute toxicity (Cat. 4), H302.
Specific target organ toxicity – single exposure (Cat. 3), Respiratory system, H335.
Acute aquatic toxicity (Cat. 3), H400.
Chronic aquatic toxicity (Cat. 3), H410.

Label elements

DANGER

H314 Causes severe skin burns and eye damage.
H302 Harmful if swallowed.
H410 Very toxic to aquatic life with long lasting effects.
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
P305 + P351 IF IN EYES: Rinse cautiously with water for several minutes.
+P338 + P315 Remove contact lenses if present and easy to do.
Continue rinsing. Get immediate medical advice/attention.
P308 + P313 IF exposed or concerned: Call a POISON CENTRE or doctor/physician.

Other hazards

Contains dipotassium peroxodisulphate. May produce an allergic reaction.

SECTION 3. Composition/information on ingredients

*Note that these classifications refer to the pure (100%) substances.

For the full text of the safety classifications (H statements), refer to Section 16.
SECTION 4. First aid measures

**General information**
Never give an unconscious person anything to drink. If symptoms persist or in all cases of doubt, seek medical advice.

**Inhalation***
If irritation occurs, rinse the mouth and throat with water. Remove the victim from exposure (move them into fresh air) and lie them down. If irritation persists or there are asthma-like symptoms, seek medical advice. If the victim has stopped breathing artificial respiration and/or oxygen may be necessary. Call a doctor immediately.

**Skin contact**
Wash affected area thoroughly with water. Remove any contaminated clothing immediately and wash it before wearing again. Seek medical advice if irritation occurs.

**Eye contact**
Check for and remove contact lenses if present. Rinse opened eye immediately with running water, also wash under the eyelids, for at least 5 minutes. Seek medical advice.

**Ingestion**
Do NOT induce vomiting. Never give an unconscious person anything to drink. If the victim is conscious, they should drink plenty of water. Seek medical help immediately.

**Self-protection of the first aider**
Rinse your hands/skin with water if they come into contact with the solution.

**Most important symptoms and effects, both acute and delayed**
No information available.

**Indication of any immediate medical attention and special treatment**
If in contact with the eyes, flush with water immediately. If ingested, do not induce vomiting. In both circumstances, seek medical attention immediately.

**Advice to doctor**
No information available.

* This should not happen, as the product is supplied in tablet form specifically to prevent the formation of dust.

SECTION 5. Firefighting measures

The product itself will not burn, although it contains ~1.5% of an oxidising agent (dipotassium peroxo-disulphate) which in sufficient quantity may intensify a fire. It is unlikely, however, that users will have sufficient quantities of tablets for this to be a concern.

**Extinguishing media**
Use carbon dioxide, dry chemical powders or foam. If water is used, control the run-off.

**Special hazards arising from the substance or mixture**
Do not allow run-off from fire fighting to enter drains or water courses. Sulphur dioxide and chlorine may be released on decomposition.

**Advice for firefighters**
Wear protective equipment and self-contained breathing apparatus if the quantity of the substance involved warrants it.
SECTION 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Avoid contact with skin and eyes. Wear a lab coat, suitable protective gloves and tightly-fitting safety goggles. Avoid splashes of concentrated solution when you make up the 1% aqueous solution by adding the tablet to the water (NOT the water to the tablet).

Avoid raising an airborne dust. As the product is provided in tablet form the chances of producing dust are small: you should NOT grind the tablets up to encourage them to dissolve (they will dissolve quickly without being powdered).

In an emergency, evacuate personnel to safe areas.

Environmental precautions
Discharge into the environment must be avoided: prevent leakage or spillage into drains or surface water.

Methods and material for containment and cleaning up
If the quantities involved are small, wash down the drain with plenty of water to dilute the product. For larger volumes, sweep up into suitable containers for disposal according to local regulations. Avoid dust formation. After cleaning, wash away traces with water.

Reference to other sections
See Section 13 for disposal instructions.

SECTION 7. Handling and storage

Precautions for safe handling
Wear a lab coat, tightly-fitting safety goggles and suitable protective gloves when preparing the Virkon® solution. Wash hands before breaks and immediately after handling the product.

Conditions for safe storage, including any incompatibilities
Store the tablets in the sealed packages they are supplied in, in cool, dry, well-ventilated conditions. Protect from moisture and contamination and keep away from combustible material. Keep out of reach of children.

Specific end use(s)
In the NCBE Cauliflower cloning kit, a solution of Virkon® is used for sterilising work surfaces.

<tr>
<td></td>
<td>Pentatapotassium bis(peroximonosulphate) bis(sulphate). Did not cause sensitisation of laboratory animals. There are rare or inconclusive reports of human skin sensitisation. There are no reports of human respiratory sensitisation.</td>
</tr>
<tr>
<td>Repeated dose toxicity</td>
<td>Pentapotassium bis(peroximonosulphate) bis(sulphate). No adverse effect has been observed in chronic toxicity tests.</td>
</tr>
</tbody>
</table>
Mutagenicity

Pentapotassium bis(peroximonosulphate) bis(sulphate)
Animal testing did not show any mutagenic effects.

Polyposphoric acids, sodium salts
Tests on bacterial or mammalian cell cultures did not show any mutagenic effects.

Malic acid
Animal testing did not show any mutagenic effects.

Dipotassium peroxodisulphate
Tests on bacterial or mammalian cell cultures did not show any mutagenic effects.

Toxicity for reproduction

No toxicity to reproduction reported.

SECTION 12. Ecological information

Toxicity

Pentapotassium bis(peroximonosulphate) bis(sulphate)

Toxicity to fish
LC50 / 96 h / *Oncorhynchus mykiss* (Rainbow trout): 53 mg / L
LC50 / 96 h / *Cyprinodon variegatus* (Sheepshead minnow): 1.09 mg / L

Toxicity to aquatic invertebrates
EC50 / 48 h / *Daphnia magna*: 3.5 mg / L.

Toxicity to aquatic plants
ErC50 / 72 h / Algae: > 1 mg / L.

Persistence and degradability
Expected to be biodegradable.

Bioaccumulative potential
No information available.

Mobility in soil
No information available.

Results of PBT and vPvB assessment
No information available.

Other adverse effects
None known.

SECTION 13. Disposal considerations

Waste from residues/unused product
Dispose of as special waste in compliance with local and national regulations.
The product should not be allowed to enter drains, water courses or the soil.

Contaminated packaging
If recycling is not practicable, dispose of in compliance with local regulations.

SECTION 14. Transport information

IMDG (Sea transport)
Not regulated.

ADN (Inland waterways)
Not regulated.

ADR (Road transport)
Not regulated.

RID (Rail transport)
Not regulated.

ICAO/IATA DGR (Air transport)
Not regulated.

SECTION 15. Regulatory information

Safety, health and environmental regulations/legislation specific for the substance or mixture
No information available.

Chemical Safety Assessment
No information available.
SECTION 16. Other information

**Full text of GHS hazard statements**

H272 May intensify fire; oxidiser.
H302 Harmful if swallowed.
H314 Causes severe skin burns and eye damage.
H315 Causes skin irritation.
H318 Causes serious eye damage.
H319 Causes serious eye irritation.
H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H335 May cause respiratory irritation.
H412 Harmful to aquatic life with long lasting effects.

Note that this Safety Data Sheet refers to the *Virkon*® tablets, not to the dilute aqueous solution that is made from them.

Usage and handling instructions are given in this Safety Data Sheet and in the Teacher’s guide which accompanies the NCBE Cauliflower cloning kit. This can be downloaded from the NCBE’s Web site: [www.ncbe.reading.ac.uk/ptc](http://www.ncbe.reading.ac.uk/ptc)

The information given in this Safety Data Sheet is based on the present state of our knowledge.

This Safety Data Sheet has been compiled and is solely intended for this product.

This Safety Data Sheet was revised on 1 June 2015, when the older (67/548/EEC [DSD]) safety classifications were deleted.

END OF SAFETY DATA SHEET
